**BONAFIDE CERTIFICATE**

This is to certify that this Project Report (Project Phase-II) is the bonafide work of

Mr. THANUSH K                      Reg. No:      211191101159,

Mr. SANTHOSH R                      Reg. No:      211191101131,

Mr. PIOUS NIRANJAN A                      Reg. No:      211051101615,

Mr. DHANUSH RAJ N                      Reg. No:      211051101005,

Who Carried out the project entitled "**AI-Integrated Home and Community Protection System Support SDG 11**" under our supervision from Dec 2024 to Apr 2025.

**Internal Guide**

**Project Coordinator**

**Department Head**

**Mrs.A.MAHESWARI**

## **DECLARATION**

We **THANUSH K ( 211191101159), SANTHOSH R ( 211191101131), PIOUS NIRANJAN A (211051101615), DHANUSH RAJ N (211051101005)** hereby declare that the Project Report (Project Phase-II) entitled **"AI-Integrated Home and Community Protection System Support SDG 11"** is done by us under the guidance of **Dr.V.PRIYADARSHINI, Associate Professor & Mrs.A.MAHESWARI, Asst.Professor & Deputy HOD** is submitted in partial fulfillment of the requirements for the award of the degree in BACHELOR OF TECHNOLOGY in Computer Science Engineering & Civil Engineering.

**DATE:**

**PLACE:**

- 1.
- 2.
- 3.
- 4.

**SIGNATURE OF THE CANDIDATE(S)**

## ACKNOWLEDGEMENT

We would first like to thank our beloved Founder Chancellor **Thiru.Dr. A.C.SHANMUGAM, B.A., B.L.,** President **Er. A.C.S.Arunkumar, B.Tech., M.B.A.,** and Secretary **Thiru A.RAVIKUMAR** for all the encouragement and support extended to us during the tenure of this project and also our years of studies in his wonderful University.

We express my heartfelt thanks to our Vice Chancellor **Prof. Dr. S. GEETHALAKSHMI** in providing all the support of my Project (Project Phase-II).

We express my heartfelt thanks to our Head of the Department, **Prof. Dr. S.Geetha,Dr.T. KAVITHA, CSE & CIVIL** who has been actively involved and very influential from the start till the completion of our project.

Our sincere thanks to our Project Coordinators **Mr. M Arun, Dr.T. KAVITHA, CSE & CIVIL** and Project guide **Mrs.A.MAHESWARI , Dr.V.PRIYADARSHINI** for their continuous guidance and encouragement throughout this work, which has made the project a success.

We would also like to thank all the teaching and non-teaching staffs of Computer Science and Engineering & CIVIL Engineering department, for their constant support and the encouragement given to us while we went about to achieving my project goals.

## ABSTRACT

Safety in the community is still a major issue in smart city planning, with growing issues of theft, fire risks, gas leaks, and delayed emergency responses. A survey of residential communities in Chennai found that 65.2% of the respondents had theft incidents, mostly in community areas (83.5%), and 55.6% had gas leaks, with 72.8% showing high concern for safety threats. To counteract the limitations, we developed an AI-Based Home and Community Safety System based on IoT-based sensors, real-time communication protocols, and mobile-based monitoring interface. The system consists of flame and gas sensors, OLED display, theft, medical, and false alarm push buttons, and buzzers and LED indicators for notification. A wireless communication framework based on MQTT protocol supports real-time emergency notification among the households to provide immediate response and risk reduction. There is also an IoT dashboard on mobile provided for real-time remote monitoring and controlling of the system, which facilitates ease of access and user interaction. The survey also reflected high community interest in AI-based safety systems with 67.4% considering them to be highly effective and 79.7% willing to trial the system. Prototype testing proved low-latency notifications, efficient hazard detection, and enhanced emergency response systems. The suggested system is in compliance with Sustainable Development Goals (SDG 11 & SDG 9) by increasing the resilience of cities and encouraging smart safety infrastructure.

**Keywords:** Community safety, AI, IoT, MQTT, Smart cities, Emergency response, Sustainable Development Goals, Urban resilience, IoT dashboard, Remote monitoring.

## MAJOR DESIGN CONSTRAINTS AND DESIGN STANDARDS TABLE

Student Group	A.Pious Niranjana (211051101615)	N.Dhanush Raj (211051101005)	K.Thanush (211191101159)	R.Santhosh (211191101131)
Project Title	AI-Integrated Home and Community Protection System Support SDG 11			
Program Concentration Area	Smart cities and Urban Development, Internet of Things (IoT) and AI Integration, Sustainable Development and Resilience			
Constraints Example	Technical Constraints, Cost Constraints, Environmental Constraints, User Adoption and Acceptance Constraints, Maintenance and Support Constraints			
Economic	Yes			
Environmental	Yes			
Sustainability	Yes			
Implementable	Yes			
Ethical	N/A			
Health and Safety	Yes			
Social	Yes			
Political	No			
Other	Power Modulation from Solar Panel			
Standards				
1	ISO/IEC 23894:2023			
2	IEEE 1451			
3	IEEE 802.11			
4	IEEE P2413			
5	NFTA 72			
6	UL268			
Prerequisite Courses for the Major Design Experiences	1. IoT and Smart System Integration 2. Artificial Intelligence for Security Applications 3. Wireless Communication and Networking
